

Vertiv™ SmartCabinet™ for Dell EMC VRTX

- Simplify deployment of Dell EMC VRTX
- Rapidly recover from failures
- Maximize uptime with remote 4G troubleshooting
- Protect assets with access control

Vertiv SmartCabinet for Dell EMC VRTX
SKU: A8195977

The Dell EMC VRTX simplified the IT infrastructure at ROBO offices, and now the Vertiv™ SmartCabinet™ for Dell EMC VRTX will simplify the deployment of Dell EMC VRTX.

This solution will save days of research on how to properly deploy your VRTX chassis. The Vertiv SmartCabinet™ for Dell EMC VRTX is a turnkey solution that contains all supporting infrastructure needed to properly deploy a VRTX chassis. The 2,700W UPS in the lockable cabinet provides between 5-20 minutes¹ of back-up power and allows remote power control of the VRTX chassis. The 8-port serial console utilizing Avocent market-leading remote access technology allows remote configuration and administration of the VRTX chassis via LAN and optional 4G LTE modem providing network health-independent serial and racadm access for deployed ROBO infrastructure.

In order to streamline the deployment of a Dell EMC VRTX chassis, all necessary cabling has been included in the Vertiv SmartCabinet™ for Dell EMC VRTX package. The research, planning and capacity optimization, usually necessary to deploy a Dell EMC VRTX solution at a ROBO site, have been replaced with the convenience of a single SKU specifically designed for Dell EMC VRTX and validated by Dell EMC.
