Emerson SmartCabinet™ for Dell VRTX

The Dell VRTX simplified the IT infrastructure at ROBO offices, and now the Emerson SmartCabinet™ for Dell VRTX will simplify the deployment of Dell VRTX.

This solution will save days of research on how to properly deploy your VRTX chassis. The Emerson SmartCabinet™ for Dell VRTX is a turnkey solution that contains all supporting infrastructure needed to properly deploy a VRTX chassis. The 2,700W UPS in the lockable cabinet provides between 5-20 minutes[1] of back-up power and allows remote power control of the VRTX chassis.

The 8-port serial console utilizing Avocent market-leading remote access technology allows remote configuration and administration of the VRTX chassis via LAN and optional 4G LTE modem providing network health-independentt serial and racadm access for deployed ROBO infrastructure.

In order to streamline the deployment of a Dell VRTX chassis, all necessary cabling has been included in the Emerson SmartCabinet™ for Dell VRTX package. The research, planning and capacity optimization, usually necessary to deploy a Dell VRTX solution at a ROBO site, have been replaced with the convenience of a single SKU specifically designed for Dell VRTX and validated by Dell.

[1] Depends on Dell VRTX load

Emerson SmartCabinet™ for Dell VRTX
SKU: A8195977

Contents	Features	Benefits
Emerson Network Power Rack	13U Fully lockable enclosure 2000lbs of capacity Rolling wheels Small Footprint: 36" D x 24" W x 30" H	Minimizes space taken up in the branch office while providing secure space for Dell VRTX chassis.
Avocent 8-port Console Server	Remotely access serial port of VRTX chassis and network equipment over WAN and 4G	Troubleshoot the system remotely independent of health of the system or of the network.
Liebert online double-conversion rack UPS	2700W of clean, filtered power. 5-20 minutes of back-up power	Keep your equipment running during short power outages and power them down safely during longer outages.
Cables, adapters, quick start instructions	All cables and adapters you need to deploy the VRTX chassis	Get it done quickly. No more trips to the store to buy additional cables.
