Avocent® Advanced Console Server for DEll

- Secure remote management for serial devices
- LTE/4G cellular remote access
- FIPS 140-2 compliant cryptography
- Easy To Deploy and Maintain with Zero Touch Provisioning

ACS Feature	ACS Benefit
Secure In-Band and Out-of-Band Network connectivity for remote access to serial devices	Provides users with the ability to access a device with a serial connection that is in a non-working state, even when the primary network is down
Auto-discovery tool	Easier configuration and management of console servers by detecting the host name of the connected target device and updating the configuration automatically
Dual Gigabit Ethernet ports and Dual AC Power	Provides hardware redundancy for improved reliability and uptime
Using internal modern or external cellular LTE/4G connectivity	Remote out-of-band access through the internal modem or alternately using a LTE/4G cellular network to access devices with a serial connection that are not accessible through the primary network
Dell-specific accessories	Simplifies connectivity to Dell equipment
